PROJECTS

Guide Me
- User centered design project.
- A social platform that will pair you with a local based on your interests and not only will you meet new people but you'll escape the "touristy" crowd.
- A desktop, iPhone, and tablet app that will have a messaging platform and travel tips.

Umbrella
- Project using HTML, CSS, Javascript, MySQL, and Node Js.
- A sports management application which can be joined by "coaches" and "team members", where coaches create teams and team members join the teams.

Logos
- Mobile application for the Android platform.
- A finance app that helps keep track of expenses and provides tips.
- Uses a pie chart library and classes.

Battleship
- C++ Project with inheritance made in QT.
- A battleship game with special bombs.

More projects on my Github
- Projects using C++ and more
